

OCEANIC OFFSHORE^{PTY LTD}

Commercial Diving Services

PROJECT: SANTOS LIMITED MEFF FLOATING ASSET REMOVAL DIVING SERVICES 2023

CLIENT: DOF SUBSEA

PROJECT DESCRIPTION

DOF Subsea required an inshore diving subcontractor to provide Diving Services in the form of a diving team to assist with cutting operations of the Detachable Turret Mooring (DTM) underside columns at anchorage in the Malus channel prior to the DTM tow to Dampier slipway for onshore disposal.

THE CHALLENGE

This included several scopes of work including the following:

- DTM is disconnected offshore by others and towed via an Anchor Handling Tug (AHT) to cyclone mooring located in the Malus channel
- AHT transfer DTM to cyclone mooring and depart
- Oceanic Offshore travelled to DTM in suitable dive vessel to commence cutting & retrieval operations.
- Oceanic Offshore cut all 12 x J-tubes & 1 x Central Column using suitable cutting tooling (e.g., Broco) so that the remaining stubs protruding underneath the bottom of the DTM are minimal.
- Retrieve cut pieces to deck and Delivery to nominated DOF Disposal subcontractor for disposal

KEY OUTCOMES

The project was completed on time and on budget with zero safety incidents. Well Done to the Oceanic Offshore team!
